# UMANG AGRAHARI

+91-7755812068 • umangagrahari.work@gmail.com • linkedin.com/in/umangagrahari21 • github.com/umangagrahari21

## OBJECTIVE

Full-Stack Developer with hands-on experience building scalable AI-powered applications using Next.js and Node.js. Passionate about performance optimization, secure system design, and building production-ready software. Seeking Software Engineering Internship roles to contribute to high-impact engineering teams.

## EDUCATION

**B.Tech – Computer Science and Engineering** *Graduating July 2027*

Pranveer Singh Institute of Technology (PSIT), Kanpur **CGPA: 7.9**

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript, SQL, C
**Frontend:** React.js, Next.js, HTML5, Tailwind CSS, Responsive Web Design
**Backend:** Node.js, Express.js, RESTful API Design, Role-Based Access Control (RBAC), JWT Authentication
**Databases:** MongoDB, Firebase Firestore, Supabase (PostgreSQL)
**Tools & Cloud:** Git (Version Control), GitHub, Vercel, Render, Firebase, Supabase
**Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, System Design Basics
**Soft Skills:** Problem Solving, Adaptability, Communication, Teamwork

## PROJECTS

### Recruit AI – AI-Powered Mock Interview Platform Live | GitHub *Feb 2026*

- Built and deployed an AI-powered mock interview platform using **Next.js**, supporting real-time voice interviews with concurrent session handling and scalable database-level security via RLS policies.
- Integrated AI language model services via REST APIs with secure authentication and scalable session management using **Supabase (PostgreSQL + RLS)**.
- Improved backend performance by reducing API response latency by 30% through optimized request handling and database queries.

*Stack: Next.js, Supabase, OpenRouter, Vapi AI, Tailwind CSS, Vercel*

### Burger Hut – Full-Stack Restaurant Ordering Platform Live | GitHub *Oct 2025*

- Developed a full-stack restaurant ordering system using **MERN architecture**, processing 200+ real-world order transactions.
- Designed secure RESTful APIs with **JWT authentication and Role-Based Access Control (RBAC)** to protect admin operations.
- Enhanced backend efficiency by 25% through optimized Firestore data modeling and middleware-based validation.

*Stack: React.js, Node.js, Express.js, Firebase Firestore, Firebase Admin SDK, Render*

### Blink AI – AI-Powered Chrome Extension GitHub *Aug 2025*

- Built an AI-powered Chrome Extension using Manifest V3 to extract and summarize webpage content, reducing manual reading time by up to 70%.
- Implemented asynchronous API handling with secure REST integrations and background service workers, ensuring zero UI thread blocking; maintained modular, scalable architecture using Git version control.

*Stack: HTML, JavaScript, Chrome Extension APIs (Manifest V3), REST APIs*

## ACHIEVEMENTS

- Solved 400+ Data Structures and Algorithms (DSA) problems across LeetCode and HackerRank.
- SIAAH Hackathon Participant – Built a full-stack solution under a 4-hour time constraint.

## CERTIFICATIONS

- Data Structures and Algorithms with Java — Udemy, 2026
- Full Stack Web Development — Udemy, 2025
- Oracle Generative AI Professional — Oracle, 2025
- TCS ION Career Edge: Young Professional — Tata Consultancy Services, 2026
